## Master's thesis

- 2018 Latent Convolutional Models  
In my thesis, I worked on a latent model of images that served as a strong universal prior for a wide variety of image restoration tasks.

---

## Undergraduate thesis

- 2016 Predicting Amplitudes of the eA (Electron-Ion) interaction with Machine Learning  
For my undergraduate thesis I used neural networks to predict amplitudes of electron-ion collisions. The predictions of amplitudes is essential to study the structure of the nucleus of the ion.
