- Summer 2015 Intern at Computational Materials Discovery Laboratory, Moscow Institute of Physics and Technology  
Worked on machine learning algorithms for crystal structure and property prediction. Created the Anduril neural network library.

## Master's thesis

- 2018 Latent Convolutional Models  
In my thesis, I worked on a latent model of images that served as a strong universal prior for a wide variety of image restoration tasks.

## Undergraduate thesis

- 2016 Predicting Amplitudes of the eA (Electron-Ion) interaction with Machine Learning  
For my undergraduate thesis I used neural networks to predict amplitudes of electron-ion collisions. The predictions of amplitudes is essential to study the structure of the nucleus of the ion.
